SOFTWARE TESTING METHODOLO HW 3

I test Kent.edu webset, and try to input "kent state" in search filed and try to find some words in the result page.

```python
webdriver.py                                              □ ⧉ ✕

 1  from selenium import webdriver
 2  from selenium.webdriver.common.keys import Keys
 3
 4  if __name__ == "__main__":
 5
 6      driver = webdriver.Firefox()
 7      #driver.get("http://www.python.org")
 8      driver.get("http://www.kent.edu")
 9      assert "Kent" in driver.title
10      elem = driver.find_element_by_id("edit-search-keys")
11      elem.send_keys("database design")
12      elem.send_keys(Keys.RETURN)
13      assert "system" in driver.page_source
14
15      assert "design" in driver.page_source
16
17      assert "computer" in driver.page_source
18
19      assert "DBA" in driver.page_source
20
21      driver.close()
22
```

```
Output

Traceback (most recent call last):
  File "/Users/shuchang/Desktop/algorithms/webdriver.py", line 17, in <module>
    assert "computer" in driver.page_source
AssertionError
```
